SYNBIO CLEAN
PRO

**CLEANER
FOR 5 DAYS**

Probiotic cleaning with
HeiQ Synbio Clean
Good for you and
good for your environment

DEEP CLEAN FOR 5 DAYS

Disinfection and harsh cleaning agents are a risk and can be fatal for our environment. Such applications create bacterial resistances and leave the surfaces clean for only a few minutes. After that microbes and germs return and invade space once again.

HeiQ Synbio cleaners are a greener alternative for harsh chemicals and biocides. Designed in nature, perfected by science, they give a much deeper, far longer lasting clean and help create a balanced microbiome on all surfaces.

The active ingredient, a unique synthesis of probiotics and prebiotics, goes to work in every nook and cranny, and keeps on going for 5 days, long after traditional cleaning agents have given up.

This provides not only a brilliant cleaning effect but is also beneficial for the environment.

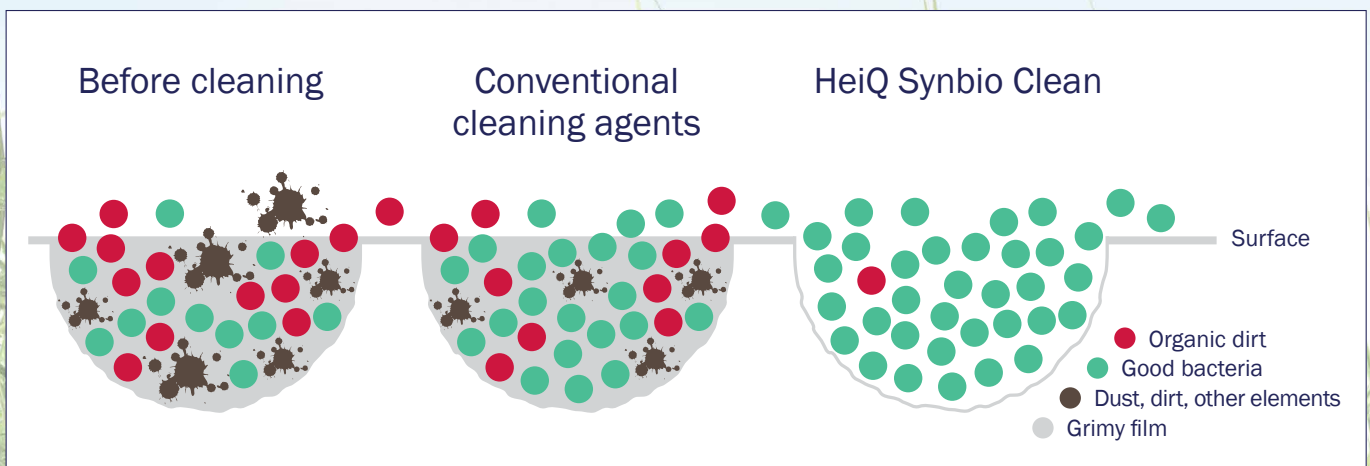

BENEFITS OF HEIQ SYN BIO CLEANING

HOW DOES IT WORK?

Very effective biodegradable surfactants guarantee professional cleaning effects right from the start.

The added probiotics (good bacteria) occupy the surface for 5 days and create a balanced microbiome in which we feel comfortable. Probiotics release enzymes that break down organic dirt for deeper and longer cleaning.

NOT JUST CLEAN, BUT SYNBIO CLEAN

Our range of probiotic cleaners with environmental beneficial effect for daily use.

- EU Ecolabel certified
- Concentrated formulation: dilute 1:100
- Available tanks: 1 liter & 5 liter
